1 Information

Manual version 0.1

Author: Ricardo Jacobs

Copyright: ICEPAY B.V.

1.1 Overview

This payment module enables the usage of the ICEPAY platform in your VirtueMart 3 webshop.

1.2 Releases

Releases can be found on the repository of this payment plugin at GitHub:

<https://github.com/icepay/VirtueMart-3>

1.3 Compatibility

The compatibility chart is available online:

<http://www.icepay.com/webshop-modules/online-payments-for-virtuemart-3>

1.4 Requirements

You need the following requirements to be able to use this payment module:

Software	
VirtueMart	See Compatibility
Joomla	See Compatibility

2 Installation

Step 1. Download

Download the payment module from the ICEPAY website or from the release list at GitHub and leave it zipped. Ensure you download the correct version for your installation. See chapter 1.3 for more information.

Step 2. Installation

Login to the Joomla Administrator section and browse to Extensions -> Extension Manager. Browse to the downloaded zip file (Named like 'x.x.x.zip') and press "Upload & Install"

Step 3. Activate the Payment module

You need to activate the payment module yourself. This is a security measure we took unlike the old versions. Go to the main menu and select Extensions and select Plugin Manager.

Search for ICEPAY and click on the Status button to activate the payment module.

3 Uninstallation

It is not recommended to uninstall the payment module. Instead, unpublish the payment module in VirtueMart.

4 Configuration

Step 1. Open the VirtueMart 3 payment methods section

Login to the Joomla Administration backend and select VirtueMart -> Payment Methods to go to the payment methods screen.

Step 2. Add ICEPAY as payment method

Click on New and fill in the following information:

Options	Description	Example setting
Payment Name	Select a name for the payment method	Pay Online (ICEPAY)
Set Alias	Set the short name of the Payment module	ICEPAY
Published	Publish	Yes
Payment Description	Description displayed during checkout, such as the payment methods possible	Pay with iDEAL, Creditcard, Paypal.
Payment Method	Select "ICEPAY Payment Module"	ICEPAY Payment Module

Step 3. Configure your Merchant settings

After applying / saving the settings, open the Configuration Tab.

Fill in the Merchant ID and Secretcode. If you did not create a Merchant ID yet, go to <https://portal.icepay.com/> and create a Merchant ID. The Postback URL can be found in the same page under Merchant ID and Secretcode in the configuration tab.

5 License

This payment module is released under the GNU/GPL license. For more information, see <http://www.gnu.org/licenses/gpl-3.0.html>
